SureFlex®
Steerable Guiding Sheath

FEEL CONTROL. SEE RESULTS.™
The SureFlex® Steerable Sheath has been engineered to provide maximum control throughout your entire procedure.

Schedule a case with one of our clinical specialists to experience the control for yourself.

**Controlled Crossing**
The advanced sheath-dilator design enables smooth and consistent access, providing you with a more predictable crossing experience.¹

**Precise Steering**
Feel your curve, know your position. Achieve maximum precision and control with TrueGlide™ Handling and intuitive tactile feedback.

**Reliable Performance**
Engineered to support consistent contact of cardiovascular catheters, while providing premium strength and durability.²

**Consistent Contact Force**
Support the consistent contact force of catheters.¹ Consistent contact force of ablation catheters provides better therapeutic results.²

**Strength and Durability**
High performance; greater durability than the leading competitor.¹ Engineered to retain your curve throughout the procedure.

**Self-locking Dial**
Maintain your position – deliver therapy on target as the dial retains your curve.

*Based on bench testing conducted at Baylis Medical Company Inc. R&D labs. Results may not be indicative of clinical performance.
TARGET

Responsive TruGlide™ Handling
Smooth, high-precision steering to confidently position your curve.

Tactile Feedback
Feel the extent of your curve deflection with intuitive tactile feedback.

Controlled Torque
Position yourself accurately with a 1:1 torque response, enabled by a composite braid design.

CROSS

Confidence in Crossing
Gain access with confidence:
• A 27% lower peak crossing force, with a smoother profile.*

Smooth Transition
A 40% smoother dilator-to-sheath transition than the leading competitor,* to facilitate a smoother crossing.

Radiopaque Tip
Control your position by visualizing sheath tip location during the procedure.

TARGET

Responsive TruGlide™ Handling
Smooth, high-precision steering to confidently position your curve.

Tactile Feedback
Feel the extent of your curve deflection with intuitive tactile feedback.

Controlled Torque
Position yourself accurately with a 1:1 torque response, enabled by a composite braid design.

DELIVER

Consistent Contact Force
Support the consistent contact force of catheters.* Consistent contact force of ablation catheters provides better therapeutic results.*

Strength and Durability
High performance, greater durability than the leading competitor.*

Self-locking Dial
Maintain your position - deliver therapy on target as the dial retains your curve.

EVERY TIME.
