SureFlex®
Steerable Guiding Sheath

FEEL CONTROL. SEE RESULTS.
Deliver

Consistent Contact Force
Support the consistent contact force of catheters.1 Consistent contact force of ablation catheters provides better therapeutic results.2

Strength and Durability
High performance; greater durability than the leading competitor.3

Engineered to retain your curve throughout the procedure.

Self-locking Dial
Maintain your position - deliver therapy on target as the dial retains your curve.

The SureFlex® Steerable Sheath has been engineered to provide maximum control throughout your entire procedure.

Schedule a case with one of our clinical specialists to experience the control for yourself.

FEEL CONTROL.
SEE RESULTS.™

Consistent Contact Force
Support the consistent contact force of catheters.1 Consistent contact force of ablation catheters provides better therapeutic results.2

Consistent Contact Force
Support the consistent contact force of catheters.1 Consistent contact force of ablation catheters provides better therapeutic results.2

Strength and Durability
High performance; greater durability than the leading competitor.3

Engineered to retain your curve throughout the procedure.
A smoother dilator-to-sheath transition than the leading competitor, to facilitate a smoother crossing.

Smooth Transition
A 40% smoother dilator-to-sheath transition than the leading competitor, to facilitate a smoother crossing.

Radiopaque Tips
Control your position by visualizing sheath and dilator tip locations during the procedure.

Responsives TruGlide™ Handling
Smooth, high-precision steering to confidently position your curve.

Tactile Feedback
Feel the extent of your curve deflection with intuitive tactile feedback.

Controlled Torque
Position yourself accurately with a 1:1 torque response, enabled by a composite braid design.

Consistent Contact Force
Support the consistent contact force of catheters. Consistent contact forces of ablation catheters provides better therapeutic results.

Strength and Durability
High performance, greater durability than the leading competitor.

Engineered to retain your curve throughout the procedure.

Self-locking Dial
Maintain your position - deliver therapy on target as the dial retains your curve.

Confidence in Crossing
Gain access with confidence:
- A 27% lower peak crossing force, with a smoother profile.

EVERY TIME.
