TorFlex™
Transseptal Guiding Sheath

SMOOTH AND CONTROLLED CROSSING.
Baylis Medical is committed to innovations in transseptal punctures. Our transseptal products are designed to provide a smooth and controlled transseptal puncture.

**TorFlex™ Transseptal Guiding Sheath**

- **Reliable and consistent hub-snap mechanism**
- **Hemostatic valve** Prevent backflow and air ingress
- **Three-way stopcock** For flushing and aspiration
- **Sideport** Aligned with distal curve
- **Controlled Torque**
  - Special braid composite design for ideal torque transmission
  - Precise catheter and sheath manipulation response in left atrium
- **Smooth Transition**
  - Sleek profile of wall for tight fit around dilator
  - Smooth advancement across septal tissue into left atrium
- **Radiopaque Marker Band**
  - Improved visibility under fluoroscopy and ultrasound
- **Two side holes** Protect against air ingress
- **Soft tip** Atraumatic distal tip
- **Control your position by visualizing sheath and dilator tip location during the procedure**

**Key Features**

- **Sleek profile of wall for tight fit around dilator**
- **Smooth advancement across septal tissue into left atrium**
- **Prevent backflow and air ingress**
- **For flushing and aspiration**

**Alignment of Curves**

- **37° Curve** Left atrium — Posterior
- **45° Curve** Left atrium — Posterior
- **55° Curve** Left atrium — Posterior
- **90° Curve** Left atrium — Inferior
- **135° Curve** Left atrium — Inferior

**Left atrium**

- **Inferior Curve** 90°
- **45° Curve**
- **37° Curve**
- **55° Curve**
- **90° Curve**
- **135° Curve**

**Left atrium — Posterior Curve**

- **45° Curve**
- **55° Curve**
- **90° Curve**
- **135° Curve**
