

ExpanSure®

Large Access Transseptal Dilator

SEAMLESS ACCESS IN LARGE SHEATH CASES.™

ExpanSure®

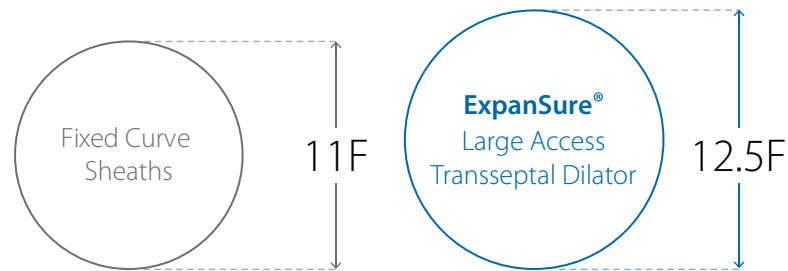

Large Access Transseptal Dilator

HIGHLIGHTS

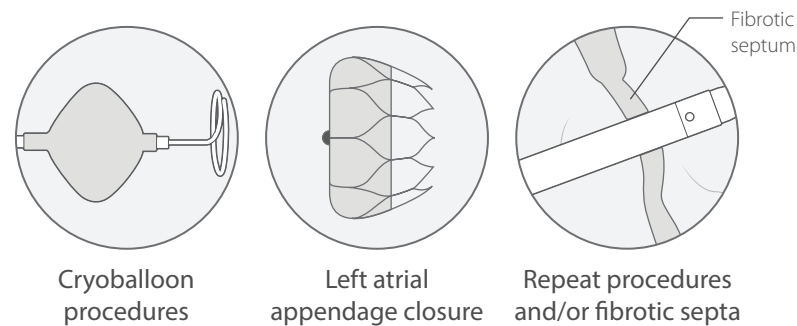

BENEFITS

1 Optimizes tissue dilation for large sheath access

Large Outer Diameter (12.5F)

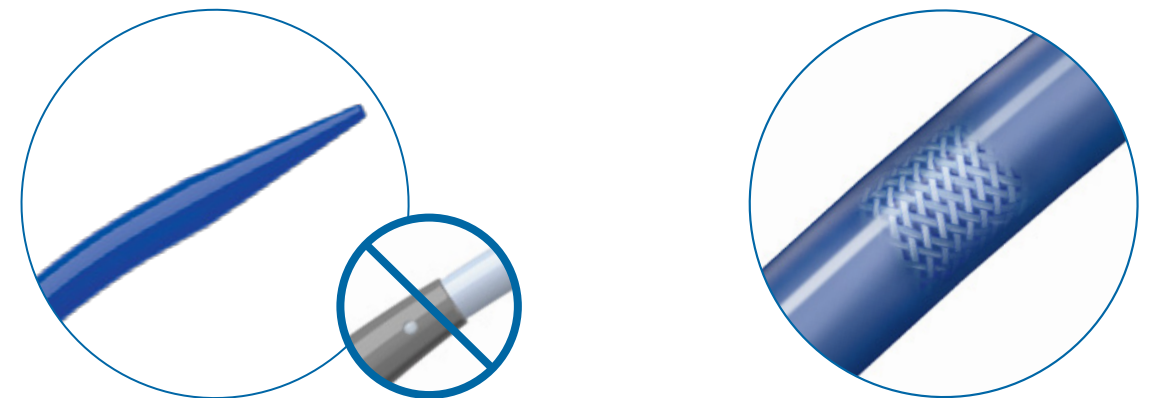

- 29% larger dilation area than a standard fixed curve sheath

Facilitates Large Sheath Access

- Optimized dilation of septum may facilitate transseptal crossing required for left heart procedures, including:
 - Cryoballoon procedures
 - Left atrial appendage closure
 - Repeat procedures and/or fibrotic septa

2 Streamlined design for seamless crossing

No Dilator-Sheath Transition

- Single device replaces fixed curve sheath and dilator
- Sleek profile for seamless advancement across septum

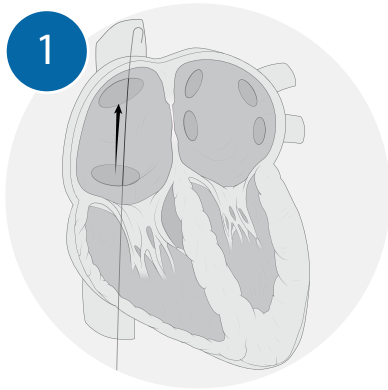

Control and Stability

- Braided composite design for stability and support during crossing

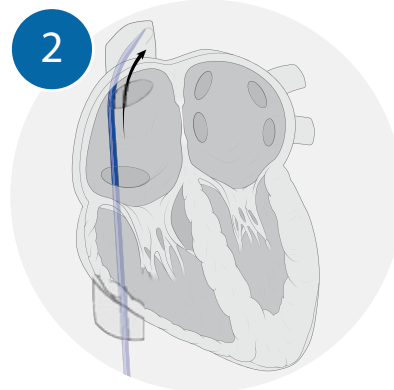

INTEGRATES INTO EXISTING WORKFLOW

The **ExpanSure**® device replaces your traditional sheath and dilator for seamless integration into your transeptal procedure

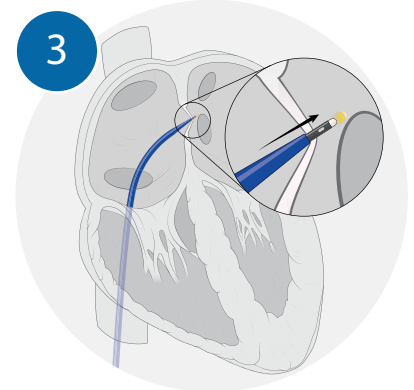

Introduce guidewire into superior vena cava (SVC)

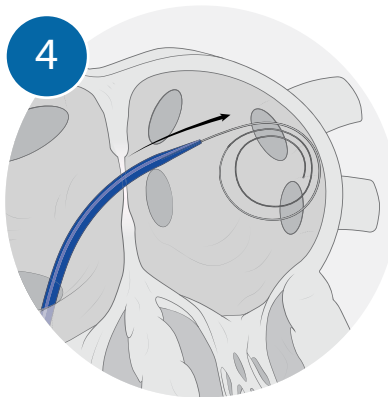

Introduce **ExpanSure**® device over guidewire

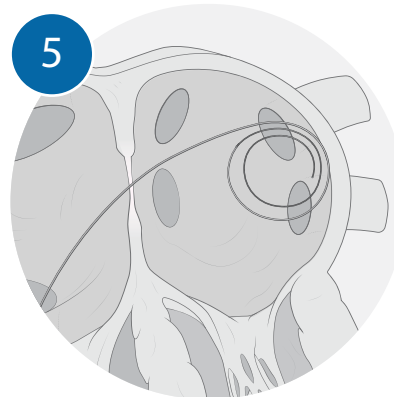

Puncture septum using **NRG**® Transeptal Needle

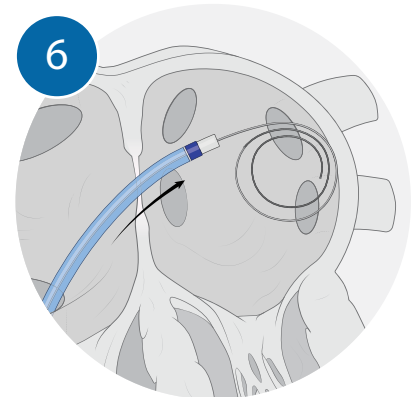

Pre-dilate septum by advancing **ExpanSure**® device, and insert exchange wire

Withdraw **ExpanSure**® device, leaving exchange wire in the left atrium

Advance large therapeutic sheath across septum

SPECIFICATIONS

Product number	Outer diameter	Guidewire max outer diameter	Usable length	Compatible needle length
ESD125-35-67-70-N	12.5F	0.035"	67 cm	71 cm
ESD125-35-85-70-N	12.5F	0.035"	85 cm	89 cm

Packaged with 0.032" outer diameter, 180 cm length guidewire.
