**Know More**

- Large Inner Lumen Size
- Able to flush contrast agent
- Compatible with 2F EPstar catheters and 0.035" guidewires
- For superior vein access only

### Specifications

**Coronary sinus angiography with contrast**
Flexible and atraumatic distal tips facilitate confidence in coronary sinus access.

GO FURTHER
- Reach previously inaccessible areas of the coronary sinus
- Flexible and atraumatic tip
- Pacing even from distal electrode

2F EXPLORE
Deeper CS mapping has been used for:
- Idiopathic VTs
- Complex ATs
- Left WPW
- Mapping and Pacing in Vein of Marshall

2F PACE
Pacing from all electrodes, including the distal electrode

2F & 6F BE CONFIDENT
Flexible and atraumatic distal tips facilitate confidence in coronary sinus access

6F CHOOSE
Two electrode spacing choices, 2-8-2 or 5-5-5, to tailor your procedure

6F CONTROL
Fully braided shaft, even under electrodes, allows greater maneuverability

Distal mapping of coronary sinus
